xercise 3: True or False with justifications (4 pts)

Statement: Storage media are used to store data.

Answer: True.

Justification: Devices like hard drives, SSDs, and USBs are designed to save data.

Statement: The first screen that appears after startup is called the "icon."

Answer: False.

Justification: It is called the desktop; icons are small pictures that represent files, folders, or programs.

Statement: You can put a folder in a file.

Answer: False.

Justification: Files cannot contain folders; only folders can contain files or other folders.

Statement: You can put a folder inside a folder.

Answer: True.

Justification: Folders can be nested to organize content hierarchically.

Statement: Microsoft Word is a software used to create folders.

Answer: False.

Justification: Word is a word processor; folders are created via the operating system (e.g., File Explorer).

Solutions for the 7th-grade computer science worksheet

Exercise 1: Complete the paragraph with the given words

- **Line 1:** Each computer is composed of hardware.

- **Line 2:** There are three types of devices: input devices which allow input information to th central unit.
  Example: keyboard

- **Line 3:** The peripherals of the central unit are the monitor, the mouse, the printer.

- **Line 4:** The devices which allow input and output information from the central unit
  Example: Modem
  are known as input-output devices.

- **Line 5:** The Windows which is a software basic which allows to use the computer.

- **Line 6:** The data is put into files which are organized in folders.

Unused words from the list: start, devices, input-output (used as a phrase inside the line).

Exercise 2: Identify names, extensions, icons, and type (file or folder)

Item shown	Name	Extension (case)	Icon type	Type
chanson.mp3	chanson	mp3	music/audio file icon	file
Devouri.doc	Devouri	doc	document/Word file icon	file
fichiers	fichiers	—	folder icon	folder
documents	documents	—	folder icon	folder

Notes: The extension is the part after the dot (e.g., .mp3, .doc). Folders do not have extensions

correction

Want me to finish Exercise 4 now?

Upload the folder diagram or list the structure like:

- C:\7th Grade Homework
  - DS
    - Software
      - Word.doc
    - Hardware
      - Keyboard.bmp

Then I'll give the active folder name, the parent names, and the exact path to Word.doc.

e : .... First name : .... Class :7B..Band: ...No.: ....   Note : ....../20
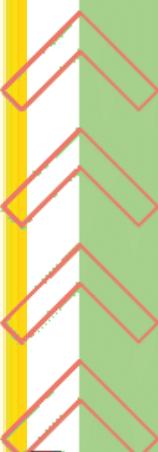

EXERCISE 1: Complete the following paragraphs using the words from the list

ext.   (3.5pts)

Printer/files/input/devices/output/software/input-output/windows/
central unit /folders/start/keyboard/Modem/hardware

To do a computer processing we need a part..........................

and other software.

Each computer is composed of a.............................. and ....

There are three types of devices: input devices which allow

of........................   information to the central unit (Exp:......................), THE

peripherals of......................which allow information to be output from the unit

central (Exp:......................) and peripherals of......................which allow

to input and output information from the central unit (Exp:......................).

To function, the computer needs an operating system.

(Exp:......................) which is a......................basic which allows to......................And

use the computer.

The data is put into......................which are organized in

of the......................

EXERCISE 2: Complete the following figures using these words.   (2.5pts)

| Extension | name | case | icon | files |

correction

Practical tasks: Step-by-step actions (3 pts)

1. **Launch File Explorer:**

   Open File Explorer (Windows + E or click the folder icon).

2. **Create "DS" in C:\7th Grade Homework:**

   Navigate to C:\7th Grade Homework → right-click → New → Folder → name it DS.

3. **Create "Software" and "Hardware" inside "DS":**

   Open C:\7th Grade Homework\DS → right-click → New → Folder → create Software and Hardware.

4. **Copy files into "DS":**

   - **Keyboard (Bitmap image):** Copy and paste the file into C:\7th Grade Homework\D

   - **Word (Microsoft Word document):** Copy and paste the file into C:\7th Grade Homework\DS.

5. **Move "Keyboard" to "Hardware" (Material):**

   Select Keyboard.bmp in DS → right-click → Cut → open Hardware → Paste.

   Note: If your sheet says "Material," use the Hardware folder (Material = Hardware).

6. **Move "Word" to "Software":**

   Select Word.doc in DS → right-click → Cut → open Software → Paste.

7. **Delete "Keyboard" in "DS":**

   If a copy still exists in DS, select it → Delete.

   (If you already moved it, there may be nothing to delete in DS.)

8. **Rename or transfer "DS" to "DS-Your Name":**

   In C:\7th Grade Homework, right-click the DS folder → Rename → DS-Your Name.

   If "transfer" means move, place it in the requested destination after renaming (e.g., to another folder specified by your teacher).

Exercise 3: True or False with justifications (4 pts)

Statement: Storage media are used to store data.

Answer: True.

Justification: Devices like hard drives, SSDs, and USBs are designed to save data.

Statement: The first screen that appears after startup is called the "icon."

Answer: False.

Justification: It is called the desktop; icons are small pictures that represent files, folders, o programs.

Statement: You can put a folder in a file.

Answer: False.

Justification: Files cannot contain folders; only folders can contain files or other folders.

Statement: You can put a folder inside a folder.

Answer: True.

Justification: Folders can be nested to organize content hierarchically.

Statement: Microsoft Word is a software used to create folders.

Answer: False.

Justification: Word is a word processor; folders are created via the operating system (e.g., File Explorer).

Exercise 4: Folder tree questions (2 pts)

need the exact folder tree from the figure to give the names and the full path (active folder, arent folders, and the location of "Word.doc"). Please upload a clear screenshot of the diagram o ranscribe the folder structure (showing which folders contain "Word.doc" and "DS").

EXERCISE 3: Answer True or False and justify if False.

	True / False	Justification if False
Storage media are used to store data.	-------	....
The first screen that appears after startup is called the "Icon"	-------	....
You can put a folder in a file.	-------	....
You can put a folder inside a folder	-------	....
Microsoft Word is an operating system.	-------	....

EXERCISE 4: Based on the figure below, answer the questions.   (2pts)
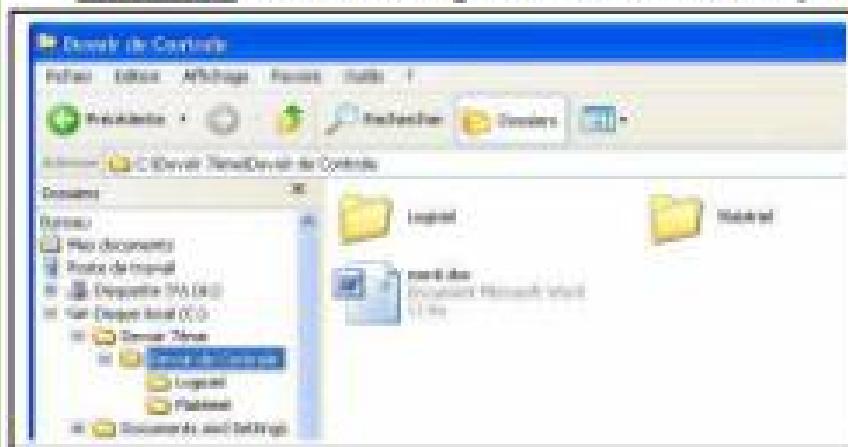

a- The active folder name:
_____

b- Number of files:
_____

c- Number of files:
_____

d- Path to the "Word.doc" file: _____

_____

Practical :

/9

1) Launch Windows Explorer.

2) In the "7th Grade Homework" folder located in Drive C:, create the "DS" folder.

3) In the "DS" folder, create the "Software" and "Hardware" folders.

4) Create the following files in the "DS" folder:

-   "Keyboard » of type Bitmap Image.

-   "Word" of type Microsoft Word Document.

5) Copy the "Keyboard" file that exists in the "DS" folder to the folder " Material ".

6) Move the "Word" file that exists in the "DS" folder to the folder " Software ".

7) Delete the "Keyboard" file that exists in the "DS" folder.

8) Change the folder name "DS" to "DS-Your name".

Bon Travail
